<i>Section 1194.21 Functional Performance Criteria , VPAT™ ,Voluntary Product Accessibility Template®</i>		
<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	<b>Supports</b>	WebCase is operated through the use of the Keyboard and mouse clicks. The keyboard functions are text entry and buttons can be accessed though the tab function.
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as	<b>Supports</b>	WebCase disables <b>no</b> accessibility features of the Microsoft Windows XP, Vista, Windows 7 operating systems.

accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.		
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	<b>Supports</b>	WebCase screens are well defined and indicate the current focus of the user during operation. All functions are easily visible for a user that does not have a visual disability.
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	<b>Supports</b>	WebCase displays the current state of the user on the interface through text.
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	<b>Supports</b>	Any images used in WebCase for controls or indicators are used consistently throughout the program.
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	<b>Not Applicable</b>	
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	<b>Supports</b>	WebCase does not override user selected contrast, color selections or other individual display attributes
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of	<b>Supports</b>	WebCase does not use any animation.

the user.		
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	<b>Supports</b>	WebCase uses color coding along with text indicators and visual elements to indicate the state of an event.
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	<b>Supports</b>	WebCase allows the user the ability to change the report produced into a variety of color selections.
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	<b>Supports</b>	WebCase does not use any flashing or blinking objects.
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	<b>Supports</b>	WebCase's electronic forms are accessible through the use of the Assistive Technology found in the Microsoft Windows Operating System.

***Section 1194.31 Functional Performance Criteria , VPAT™ , Voluntary Product Accessibility Template®***

<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) At least one mode of operation and information retrieval that does	<b>Supports</b>	WebCase supports the use of Assistive technology, including popular screen

<p>not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.</p>		<p>readers</p>
<p>(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.</p>	<p><b>Supports</b></p>	<p>Screen magnifiers do work with WebCase</p>
<p>(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided</p>	<p><b>Supports</b></p>	<p>Hearing is not required</p>
<p>(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive</p>	<p><b>Supports</b></p>	<p>WebCase itself does not use audio as a function, it does however support the use of browsers that do.</p>

hearing devices shall be provided.		
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	<b>Not Applicable</b>	WebCase does not require the use of speech for any functionality.
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	<b>Supports</b>	Fine Motor control or simultaneous action is not required. Workstation is operable via keyboard. WebCase provides keyboard accessibility through tab order to all significant features so mouse is not required.

***Section 1194.41 Information, Documentation and Support, VPAT™, Voluntary Product Accessibility Template®***

<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge	<b>Supports</b>	Electronic documentation is available on the Internet from our website at: <a href="http://www.veresoftware.com">www.veresoftware.com</a> . Additionally, a comprehensive “Help” file is including

		with the product.
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	<b>Supports</b>	Electronic documentation is available on the Internet from our website at: <a href="http://www.veresoftware.com">www.veresoftware.com</a> . Additionally, a comprehensive “Help” file is including with the product.
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	<b>Supports</b>	Support is available online and via telephone. Deaf or hard of hearing users can use the national relay service to converse with Vere Software representatives.
