Criteria	Supporting Features	Remarks and explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	<b>Supported</b>	WebCase is operated through the use of the Keyboard and mouse clicks. The keyboard functions are text entry and buttons can be accessed though the tab function.
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as	<b>Supported</b>	WebCase disables <b>no</b> accessibility features of the Microsoft Windows XP or Vista operating systems.

accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.		
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	<b>Supported</b>	WebCase screens are well defined and indicate the current focus of the user during operation. All functions are easily visible for a user that does not have a visual disability.
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	<b>Supported</b>	WebCase displays the current state of the user on the interface through text.
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	<b>Supported</b>	Any images used in WebCase for controls or indicators are used consistently throughout the program.
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	<b>Not Applicable</b>	
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	<b>Supported</b>	WebCase does not override user selected contrast, color selections or other individual display attributes
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of	<b>Supported</b>	WebCase does not use any animation.

the user.		
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	<b>Supported</b>	WebCase uses color coding along with text indicators and visual elements to indicate the state of an event.
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	<b>Supported</b>	WebCase allows the user the ability to change the report produced into a variety of color selections.
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	<b>Supported</b>	WebCase does not use any flashing or blinking objects.
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	<b>Supported</b>	WebCase's electronic forms are accessible through the use of the Assistive Technology found in the Microsoft Windows Operating System.
